PROJECTS

2DO-APP | ⊙ | 🌐

- All my projects are created using React.Js and hosted in Firebase.
- React hooks useState and useReducer are used to manage state and include functionalities like adding a new task, marking a task as completed and deleting a task.

Calculator | ⊙ | 🌐

- The logic for calculations are coded from scratch using useReducer hook, instead of using a Math library.

Portfolio | ⊙ | 🌐

- A static single page application created using React.Js utilizing packages like React-router-dom, React-scroll and React-icons.
